Ensuring highest quality of deliverables and standards.

Delivering latest in cutting edge Technology to customers at competitive prices.

OUR VISION

Our vision is to be globally admired organization that enhances our products & services with our highly skilled and motivated professional team by getting support of community to serve the Industry and adding value in development of the India.

ABOUT THE COMPANY

Aditya Interiors was established in 2011 for sales and service support of stretch ceiling solutions, having its own Brand “ZENCEIL Stretchceiling”.

Our Determination is to provide quality products and reliable customer service to our esteemed client with an integrated manufacturing facility with a cost effective method.

We are committed for the advancement of technologies in the development of customized products and flawless operations.

We have integrated manufacturing facility with a team of Trained and Skilled employees. Working at different locations at PAN India.

We undertake turnkey projects.

ADVANTAGES

Zenceil Stretch Ceiling is 100% Recyclable.

A dry working site with no smell or dust.

No painting required, with minimum maintenance. Easily washable with water or any particular cleaning solutions.

Can be easily installed and dismantled, without any damage to the material thus improving accessibility.

Perfect for humid Environments.

Registration in terms of reaction to fire in public place B-S2 do (Formerly M1, B1, Assessed to class O)

No emission of CFC or HCFC.

Zenceil Stretchceiling are produced with plasticisers guaranteed with no phtalate.

Light Reflection : For Translucent Ceiling, 10% Light.

Light Transmitting : For Translucent 75% approx.

Physical Properties : Thickness 0.170 mm

Weight 221 gms/m²

Ecological : 100% Recyclables

Acoustic : Sound Absorption Average : 0.85,

Noise Reduction Coefficient : 0.85

Fire Safety : Fire Behaviour B, Smoke Production S2

Flaming Droplets d0, Fire Classification B-s2, d0

OUR PRODUCTS

3d Forms

The stretched ceiling is structured to give 3D architectural effect.

It might be done by integrating multilevel framing of 3 dimensional structures. Such applications make your interior appear extraordinarily inviting, creative and aesthetically appealing.

Texture

We can transform your space into a frame of lights with different colors and textures. You can choose your personal textured theme from a broad spectrum of colors and shades. A slightly translucent version can provide additional light effects.

Light Design

We provide customized stretch ceiling lights for better and aesthetic look.

We are specialized in Amoeba Lights.

OUR PRODUCTS

Translucent

Translucent Stretch Ceiling is the most attractive finish which gives a royal and aesthetic look to both your office space and home space.

Translucent light stretch ceiling when installed enlightens the entire ceiling, with its commendable shape and size

Clients can use RGB led lights to create special play of light and shadow.

Printed

We have a team of printing professionals who use the most advanced techniques to print in large format.

Any digital image you choose can be printed on the film. Choices are numerous the only limit is the imagination.

Lacquer

The main feature of lacquer finish is to reflect direct and indirect light. This makes the setting wider and brighter, increasing volumes and heights as well as enhancing furniture, decorations, walls, paintings etc.

Lacquer stretch ceilings are available in many different colors including mirror and chrome finish.

Technical Information for Typical Stretch Ceilings

Maximum Recommended Square Metre Size Per Sheet on Aluminium Tracks

Matt – 60 sq. m / Satin – 60 sq m / Lacquer & Metallic – 60 sq. m / Translucent – 50 sq. m

Weight per sq mt

Matt – 0.18kg / Satin – 0.17kg / Lacquer & Metallic 0.17kg

Acoustic Properties DIN EN 20354 (ISO 354) – 100mm VOID

Absorption coefficients guide for typical installation using stretched materials with minimum 45mm insulation above.

Standard Non Perforated

Frequency (HZ)	100	125	250	500	1k	2k	4k
Absorption Coefficient ()	0.14	0.17	0.63	0.64	0.24	0.19	0.14

Perforated 500,000 holes / per sq mt

Frequency (HZ)	100	125	250	500	1k	2k4k	
Absorption Coefficient ()	0.15	0.18	0.68	1.01	0.79	0.70	0.61

Thermal Emission Factor NH/PTH

Matt – 0.16 / Satin 0.16 / Lacquer & Metallic – 0.15

Thermal Emission Factor ESPIL

Matt 0.84 / Satin 0.84 / Lacquer & Metallic – 0.85

Antistatic

Typical average for Lacquer – 4.10 at 11ohms

Light reflectance and transmission

Colour / finish	Reflectance %	Transmission
White Lacquer	78.8	9.6
White Matt	81	9.8
Translucent	39.2	74.9

Fire Rating

Awarded new Euro classification to: EN13501-1, Rating: B S1 d0, UK Equivalent to Class “0” designation for building regulations.

Vapour Barrier

Stretch has gained awards from the Swimming Pool and Allied Trades Association – Vapour Tested NF EN 14716 §4.1.3

Hygiene Typical Microbiological Trial

14 Days – chlorinated solution wipe after 7 days – inoculated Bacterium – E.Coli, Listeria, Salmonella, Yeast, Mould – NONE DETECTED.

General

Ceiling sheet thickness nominal 0.2mm and is manufactured in roll from with ultrasonic flush welded joints starting at approx 1.5m centres. Plastic track can be heat bent to match curved.

SCOPE OF STRETCH CEILING

Unlimited Possibilities

SELECTING ZENCEIL CRITERIA FOR USE

INNOVATIVE

- Benefit from continuous technical and decorative progress
- Extend their applications to new sectors, create suitable techniques.
- Allow innovative designs, increasing creative scope.
- Can be used for any new project. The ceilings, custom-made in the factory, are stretched when hot and inserted into the tracks.

- Quick installations, producing no debris, reducing room immobilization time.
- Dry and clean installation.

INSTALLATION

- Installed by ZENCEIL approved skilled professionals.
- Tracks are secured at the desired height on the wall perimeter.

ENVIRONMENT

- Protect the environment – low energy consumption.

- Long service life.
- 100% recyclable.

AESTHETICS

- Superb, exceptional finish.
- A solution for all technical problems.
- Pure lines and shapes contribute to better result.

SELECTING ZENCEIL CRITERIA FOR USE

SAVINGS

- Guaranteed by the manufacturer for 10 years against manufacturing defects: harpoon and strip seams.
- Excellent value for money, durable installation.
- Easy to maintain.
- Protects frames, concrete or steel structures, roofing soffits.
- Offer dual energy savings: decrease in volume to be heated, reduction in heat losses.

MAINTENANCE

- Ceiling can be disassembled at any time in a matter of minutes.
- Easy access to plenum in the event of water damage, repair work on technical equipment, and return to original shape.
- Can be cleaned with suitable ZENCEIL products.
- New light systems and technical equipment can always be installed in conjunction by the ZENCEIL approved installation specialist.

WATERPROOF

- Insensitive to damp, condensation, effective vapor barrier.
- Suitable for buildings with high relative humidity levels.
- Most textures are washable with water.

SELECTING ZENCEIL CRITERIA FOR USE

HYGIENE

- Several textures washable with suitable products.
- Washable with water hose in some cases.
- Retain dust from plenum. Prevent ceiling fibers from being suspended in air.
- Guaranteed free of cadmium and solvent releases.
- Fungicidal, with no mould growth.
- Non-toxic (in compliance with European and international standards).

- The ceilings, custom-made in the factory, are stretched when hot and inserted into the tracks.
- Quick installations, producing no debris.
- Dry and clean installation heat insulation.
- With the hollow ceiling or high floor, ZENCEIL creates an air lock.
- The air lock, similar to double glazing, forms an insulating buffer and prevents condensation formation on the ZENCEIL fabric.

QUALITY & SAFETY

- The standard fire retardency level of our ceiling film is B-s2, d0 (in acc. with DIN EN 14716).
- B-s1, d0 (in acc. with DIN EN 14716) available for selected colors.
- Certified QM system (in acc. with DIN EN ISO 9001:2008).
- Certified low water vapor permeability.
- Material holds back a certain amount of water in case of water damage.

SELECTING ZENCEIL CRITERIA FOR USE

ECOLOGY

- Basic formulation free of phthalates.
- Certified low heavy metal migration (RoHS directive compliance).
- Recyclability of material.
- Certified low emission, class A+.

HEALTH & COMFORT

- Micro-perforated membrane for acoustic ceilings.
- BioProof treated film available.

DECORATIVE

- Countless design possibilities in terms of colors, shapes and structures.
- Available in various colors and surface finishes.
- High gloss surface with best mirror effect in the market.
